

OverSite

Your ultimate OSINT tool

Welcome to OverSite

- realtime information at your fingertips

In a world where information is paramount, the ability to gather, analyse, and act upon accurate intelligence can make the difference between success and failure.

OverSite is your gateway to navigating the complexities of modern intelligence needs, designed to empower your organisation with actionable insights and a competitive edge to deal with the developing drone, UAV and UxV threat.

Our cutting-edge OSINT (Open Source Intelligence) drone intelligence database is designed to cater to your unique mission objectives, providing you with the insights you need to stay ahead of the curve.

Key benefits of OverSite

Customised intelligence

Receive intelligence reports tailored to your specific operational context, enhancing your decision-making processes.

Seamless data integration

Export your data effortlessly into CSV format, facilitating smooth integration into various applications.

Enhanced strategic planning

Gain critical insights to develop your own Tactics, Techniques, and Procedures (TTPs), allowing for robust strategic planning.

Comprehensive defense solutions

Make informed decisions on the purchase of Counter-Unmanned Aerial Systems (C-UAS) with detailed specifications provided by OverSite.

Choose OverSite to transform your operations

- Bespoke OSINT collection and reporting
- Real-time data from global sources
- Country-specific intelligence reports
- Customisable searches
- Geolocated data
- User-friendly data export
- Multimedia integration
